

PRODUCT DATA

NET BLEEDER

REF : DIANET135

X	vacuum moulding	X	vacuum infusion		RTM
---	-----------------	---	-----------------	--	-----

DESCRIPTION / UTILISATION

DIANET 135 is a net bleeder fabric which has a very high porosity allowing good air and resin flow. **DIANET 135** has a good elongation. This bleeder is recommended for vacuum infusion technology with polyester or epoxy resins. This net has been heat setting in order to avoid the rolling up of the flanges. This product doesn't contain silicone or oil : **DIANET135** is an autorelease bleeder. **DIANET135** is recommended for very large part.

DIANET 135 can be used in the vacuum moulding process in order to precompact the prepregs.

SELF LIFE

Keep this net at room temperature and normal hygrometry.

CHARACTERISTICS / PRESENTATION

Colour	Weight	Release	Max. Serv. Temp.	Thickness	Type
Green	135 gr/m ²	YES	90°C	1190μ	CO PE

Aspect	Packaging	Width	Length
knit	roll	2 m & 4 m	100 & 50 ml

Vacuum porosity

Pressure	Air porosity
100 Pa	10 100 l/m ² /s
200Pa	14 600 l/m ² /s
